This is my first LaTex document.

Suppose we sre given a rectangle with side lengths $(x+1)$ and $(x+3)$. Then the queation $A = x^2 + 4x + 3$ represents the area of the rectangle.

Suppose we sre given a rectangle with side lengths $(x+1)$ and $(x+3)$. Then the queation

$$A = x^2 + 4x + 3$$

represents the area of the rectangle.

$$x^{(}10)$$
